

This is a radio transmitter for "foxhunting".  
It's like geocaching, but the players don't have  
GPS coordinates to look for the cache. Instead,  
this box transmits a radio signal and the players  
have to track the signal.  
If you find this box, please leave it alone,  
players are looking for it today. We'll pick  
it up in a few hours when the game is over.  
You can find more information on foxhunting by  
doing a google search for "transmitter hunting".  
Contact me (Nathan Fisher) at 319-230-1571 or  
n0zyc@vftp.net If you have any questions.
