Great charger!

This is a nice Lithium charger. It has an advantage over other chargers because it can charge a battery that is completely discharged. Unfortunately the brand new ECI Power battery I received is defective and will not accept any charge. Possibly a bad BMS board. I do recommend this charger for your lithium batteries.

Issues resolved quick

I bought four of these units I had a problem with one I had no problem getting it replaced before units I have are working perfectly very happy with the product thank you expert power.
