

This is a radio transmitter for "foxhunting".
It's like geocaching, but the players don't have
GPS coordinates to look for the cache. Instead,
this box transmits a radio signal and the players
have to track the signal.

If you find this box, please leave it alone,
players are looking for it today. We'll pick
it up in a few hours when the game is over.

You can find more information on foxhunting by
doing a google search for "transmitter hunting".

Contact me (Nathan Fisher) at 319-230-1571 or
n0zyc@vftp.net If you have any questions.
